RONALD MCDONALD CARE MOBILE Dental Program

St. Christopher's Hospital for Children Community Oral Health Initiatives

Families have trusted our dental program as their family's dental home for OVER 20 years.

We see children at schools for family convenience and consistent care.

We also offer hours outside of school, including when school is closed for holidays, every Tuesday evening, and during the summer months at our home site.

Our Pediatric Dentist and Team provide preventive care to keep teeth healthy and restore teeth when cavities occur. Available for ages 6 months to 17 years.

It is very important to keep baby teeth healthy because unhealthy baby teeth can affect the development of adult teeth.

Families/students from the school incur **NO COST** for services, whether at school or at our home site. We bill Medicaid and cover uninsured patients.

Homesite location: St. Christopher's Hospital for Children parking lot, 215-427-8877
